REVISION HISTORY

001	19.12.18	Re-Approved	Team	Team	Schorling
000	13.12.18	Approved	Team	Team	Schorling
B01	14.11.18	Issue for Review	Team	Team	Schorling
A01	12.11.18	Issue for IDC	Team	Team	Schorling
Rev.	Date	Issue, Purpose	Prepared	Checked	Approved

Instructions:

1. Bidder is responsible for correctness of all calculated sum values.
2. Bidder shall fill cells highlighted with a colour.
3. Bidders unit rates shall be filled into cells highlighted with yellow colour.
4. Cells highlighted with a different colour than yellow may be filled based on relevant subsheets (colour indicates a reference to a subsheet)
5. Piping DN1400 including T-pieces DN1400 are part of Pipeline works.
 Welds between ball valve DN1400 and piping DN1400 are part of Pipeline works.
 All other works related to installation of ball valve DN1400 are considered as Mechanical works.
6. All figures concerning unit quantity are indicative only. Bidder shall verify these figures prior to submitting the offer.
7. Prices provided by Bidder in SPRQ will be considered as prices for 14-Month Scenario. Prices for other scenarios for evaluation purposes will be recalculated by using coefficients under items K1, K2 or K3 as applicable. In case selects 12-Month Scenario, 11-Month Scenario or 10-Month Scenario, all items in SPRQ concerning 14-Month Scenario shall be multiplied by the respective coefficient.
8. Bidder shall provide unit prices also for items where 0 quantity is stated.

Item Number	Item Description	Quantity	Unit	Unit Price Supply [Euro]	Unit Price Installation [Euro]	Total Price [Euro]	Payment
P1	TOTAL PRICE BASE ITEMS (14-Month Scenario)						
P2	TOTAL PRICE OPTIONAL ITEMS						
P3	TOTAL PRICE UNIT RATES [(Total Price - Pipeline UR) + (Total Price - Mechanical UR)]						
K1	Coefficient K1 for 12-Month Scenario as per Draft Contract which will be applied on the 14-Month Scenario as a base scenario.						
K2	Coefficient K2 for 11-Month Scenario as per Draft Contract which will be applied on the 14-Month Scenario as a base scenario.						
K3	Coefficient K3 for 10-Month Scenario as per Draft Contract which will be applied on the 14-Month Scenario as a base scenario.						
0	GENERAL SERVICES						
0.1	Project management Including engineering/progress/construction/HSSE/QA meetings, reporting, DCC, development of method statements, plans, procedures, etc. Other requirements as per documents General Technical Requirements and Scope of Work.	1	Lump sum	XXXX	XXXX		overall progress
0.2	Permits, fees, insurances, etc. Acquisition of all required permits, etc. Other requirements as per documents General Technical Requirements and Scope of Work.	1	Lump sum	XXXX	XXXX		overall progress
0.3	Engineering Includes but is not limited to detail realization documentation incl. side constructions as required (e.g. closed crossings, bridges, roads, special methods, etc.) for approval/review, testing and commissioning documentation, documentation for trial operation permit and as-built documentation. Other requirements as per documents General Technical Requirements and Scope of Work.	1	Lump sum	XXXX	XXXX		overall progress
0.4	Procurement Procurement of materials and equipment others than supplies by Employer. Other requirements as per documents General Technical Requirements and Scope of Work.	1	Lump sum	XXXX	XXXX		overall progress
1	PREPARATORY WORKS						
1.1	Surveys and As-Built Documentation	1	Lump sum	XXXX	XXXX		overall progress

Item Number	Item Description	Quantity	Unit	Unit Price Supply [Euro]	Unit Price Installation [Euro]	Total Price [Euro]	Payment
	Perform all required general and construction surveys, staking out of site and marking of all crossed underground facilities incl. hand excavation probes, as-built surveys and documentation works incl. handover of hardcopies and native files. Additional geotechnical, topographical, as-built and other surveys for need of General Contractor.						
	Archaeological, pyrotechnical surveys.						
1.2	Passports, photo/video documentation Obtaining photographic/video documentation of given area including access routes, trees, and non-forest vegetation, etc. Other requirements as per documents General Technical Requirements and Scope of Work.	1	Lump sum	 	 		overall progress
1.3	Mobilization Complete mobilization of all materials, equipment, machinery, personnel, fences, land, etc. to finalize the works incl. associated costs, measures, temporary site facilities alongside pipeline route incl. water, electricity, mobile toilets, parking places and other supplies for construction purposes.	1	Lump sum	 	 		milestone
1.4	Site installations, temporary offices and stockyards Requirements as per documents General Technical Requirements and Scope of Work. Including operation of constructed pipe yards.	1	Lump sum	 	 		overall progress
2	CONSTRUCTION						
2.1	Pipeline						
	All works and costs required to finalize works as per contract, project (tender) documentation, permits, authority statements, and description below (but not limited to), etc. The contractor can base his calculation on above mentioned documents but it is the CONTRACTOR's responsibility to gather all information required for the CONTRACTOR's assessment and price. Unit m1 stands for linear pipeline (road) meter as per horizontal chainage incl. full width of RoW. Real 3D length and construction reserve (e.g. cut & waste) must be considered by the CONTRACTOR. In case of casing pipes, real lengths are listed.						
2.1.1	General Pipeline Construction This cost group comprises all required construction and installation costs (equipment, services and consumables) of main pipeline, fiber optic cable and cathodic protection according to project documentation.						
2.1.1.1	Preparation of Working Strip	63 055	m1				activity progress

Item Number	Item Description	Quantity	Unit	Unit Price Supply [Euro]	Unit Price Installation [Euro]	Total Price [Euro]	Payment
	Clearing, topsoil stripping, grading, preparation and maintenance of working strip incl. stations and access roads incl. transport of materials and eventually topsoil, disposal of excess materials and import of required materials. Survey and marking of working strip and all 3rd party facilities. Any obstacles and difficulties of the preparation of the ROW have to be calculated into the price.						
2.1.1.2	Loading, Unloading, Piling up and Transportation of Material Material receipt, acceptance, storage, handling and transport of all pipeline and construction materials. Accounting and management of materials and return of surplus materials.	1	Lump Sum				activity progress
2.1.1.3	Stringing and Bending of Pipes Handling, transportation and stringing of all materials. Stringing, and cold field bending of pipes including the necessary site surveys.	63 055	m1				activity progress
2.1.1.4	Welding Internal cleaning, cutting, bevelling, execution of complete girth welding incl. repair welds, coordination with third parties like inventory survey NDT, etc. Including all tie-in's and for all wall thicknesses, welding and welder qualifications and cutting out of welds for testing. Including welding/installation of station piping DN1400.	63 055	m1				activity progress
2.1.1.5	Field Coating Field coating of all girth welds incl. surface preparation and repair of damaged areas of factory coating including inspection.	63 055	m1				activity progress
2.1.1.6	Trenching Excavation of pipeline, fiber optic cable and cathodic protection system trenches incl. required bell holes. Separation of excavated soil layers where required. Excavation and securing with proper support and protection of third party structures, line facilities/utilities, including entire handling, trench dewatering, water table management and other water measures according to permits and authorities. Trench wall supports, planking and strutting, etc.	63 055	m1				activity progress
2.1.1.7	Laying of Pipeline Lowering in of pipe strings, execution of tie-in welds NOT included in other items. Holiday detection and repair coating.	63 055	m1				activity progress
2.1.1.8	Bedding and Padding	63 055	m1				activity progress

Item Number	Item Description	Quantity	Unit	Unit Price Supply [Euro]	Unit Price Installation [Euro]	Total Price [Euro]	Payment
	Preparation of bedding and padding with suitable material incl. compaction.						
2.1.1.9	Laying of FOC Conduits Installation, bedding, padding, backfilling, reinstatement, protection, testing and marking of conduits incl. signal wire and chambers in the same m1 length as pipeline above. Conduits are placed mostly in pipeline trench.	1	Lump Sum				activity progress
2.1.1.10	Backfilling of the Pipeline Trench Supply and installation of warning tapes, delivery of additional backfill material, backfilling of the pipe trench in layers, compaction, etc. Special compaction measures at crossings and stations to avoid dangerous settlements.	63 055	m1				activity progress
2.1.1.11	Reinstatement Reinstatement of all whole Right of Way to original or better quality incl. pipeyards, stations and all used roads. Proper removal and disposal of all surplus and rubbish materials such as stones, geotextiles, gravel, etc. Reinstatement of topsoil (technical and biological) and installation or surface protection such as erosion measures all to satisfaction of landowner / tenants and authorities.	63 055	m1				activity progress
2.1.2	Protection and Special Measures This cost group comprises of all required extra construction and installation costs (equipment, services and consumables, etc.) to General Pipeline Construction costs required for particular items.						
2.1.2.1	Access Roads Improvement and stabilization of existing access roads. Erection, maintenance and reinstatement of temporary access roads.	1	Lump Sum				overall progress
2.1.2.2	Temporary Construction Roads - Working Strip Stabilization Stabilization and installation of working strip/construction road for construction and transport purposes.	1 537	m1				overall progress
2.1.2.3	Buoyancy Control and Pipeline Protection Installations Supply and prefabrication of buoyancy control and pipeline protection measures like continuous concrete coating, discontinuous weighting with prefabricated concrete weights and additional protective coatings. Installation costs incl. transport, storage, additional earthworks, etc. to be included in cost of crossings under General Pipeline Construction.						

Item Number	Item Description	Quantity	Unit	Unit Price Supply [Euro]	Unit Price Installation [Euro]	Total Price [Euro]	Payment
2.1.2.3.1	Concrete Weights Continuous Including FOC conduits weights	197	m1				overall progress
2.1.2.3.2	Concrete Weights Alternately Including FOC conduits weights	1 352	m1				overall progress
2.1.2.3.3	Concrete Coating Including FOC conduits weights	130	m1				overall progress
2.1.2.3.4	Additional Coating - geotextile 1000g/m2 Applicable for steep slopes and areas prone to buoyancy (apart of watercourse crossings).	927	m1				overall progress
2.1.2.3.5	Additional Coating - Cemtex or equivalent (e.g. GRP) Applicable for open cut road crossings. Alternatively HDPE rockshield mesh can be used.	858	m1				overall progress
2.1.2.3.6	Additional Coating - Cemtex or equivalent (e.g. GRP) Applicable for watercourse crossings.	1 390	m1				overall progress
2.1.2.4	Transport Difficulties Along Pipeline Route Difficulties by transport of pipes, bends and materials along the pipeline route (e.g. portions inaccessible for wheeled vehicles)	1	Lump Sum				overall progress
2.1.2.5	Steep Slopes Supply, installation and execution of all transport and special measures and installations within steep slopes except of additional coating.	711	m1				overall progress
2.1.2.6	Pipeline Crossings of Third Party Installations Restrictions of construction works and measures in vicinity of third party installations (e.g. manual excavation, additional earthworks, special equipment, single pipe laying, welding in trench, facility support and protection, casing/gutter, re-bedding, re-padding, marking, compaction, blinding, etc.).	63 055	m1				overall progress
2.1.2.7	Protection of Third Party Installations Protection and marking of third party facilities crossed by site transport incl. following administrators / owners requirements.	63 055	m1				overall progress

Item Number	Item Description	Quantity	Unit	Unit Price Supply [Euro]	Unit Price Installation [Euro]	Total Price [Euro]	Payment
2.1.2.8	Relocations Relocation of tracks/roads and ditches/streams in collision with the pipeline.	1	Lump Sum				overall progress
2.1.2.9	Reparation and Relocation of Drainage Systems Reparation and relocation of drainage systems encountered and damaged during construction works.	1	Lump Sum				overall progress
2.1.2.10	Terrain Check and Measures in Undermined Areas Regular terrain check and measures in undermined areas.	1	Lump Sum				overall progress
2.1.2.11	Ditch Slope and Drainage in Land Slide Areas Reduction of ditch slope angle and drainage of pipeline ditch in the land slide areas inc. monitoring measures.	1	Lump Sum				overall progress
2.1.2.12	Improvement of Existing Roads Improvement of existing roads as per agreements with owners / operators						
2.1.2.12.1	Road at Přečaply	355	m1				milestone
2.1.2.12.2	Road at Straná u Nechranic	1 006	m1				milestone
2.1.2.12.3	Road at Pesvice	351	m1				milestone
2.1.3	Environmental Provisions Extra Lump Sum charge for special environmental and reinstatement provisions specified in project documentation and authority statements such as (but not limited to), EIA, hydrogeological assessment, etc.						
2.1.3.1	Protection and Compensation Environmental Measures Provide protection and compensation environmental measures according to requirements of relevant authorities.	1	Lump Sum				overall progress
2.1.3.2	Compensatory Out Planting of Trees and Bushes Outside Forests Provide compensatory out planting of trees and bushes including 5 years maintenance for the deforested areas and single trees within the working strip, along the access roads outside forests and wherever prescribed by authorities.	1	Lump Sum				overall progress
2.1.3.3	Substitute Planting Within Forest Land Plots	1	Lump Sum				overall progress

Item Number	Item Description	Quantity	Unit	Unit Price Supply [Euro]	Unit Price Installation [Euro]	Total Price [Euro]	Payment
	Provide substitute planting of forest land plots including 7 years maintenance for reinstated areas within the working strip incl. signed handover to land owners, tenants or their forest managers.						
2.1.3.4	Drinking Water Sources Protection Measures	1	Lump Sum	XXXXXX	XXXXXX		overall progress
	Complete measures for preservation of drinking water sources incl. water monitoring e.g. as per hydrogeological assessment.						
2.1.4	Railway Crossings						
	Extra Lump Sum charges to construction and installation costs under General Pipeline Construction or Protection and Special Measures. This costs group includes all additional measures, installations and works, NOT included in the required construction and installation costs under General Pipeline Construction or Protection and Special Measures costs (e.g. special crossing methods, additional earthworks, construction pits stabilization, supply and installation of casing pipes, protective pipes, spare conduits, concrete slabs, etc.)						
2.1.4.1	Railway Crossing DZ-001, Inner Casing Pipe Length = 124 m	1	Lump Sum	XXXXXX	XXXXXX		milestone
2.1.4.2	Railway Crossing DZ-002, Inner Casing Pipe Length = 22 m	1	Lump Sum	XXXXXX	XXXXXX		milestone
2.1.4.3	Railway Crossing DZ-003, Inner Casing Pipe Length = 24 m	1	Lump Sum	XXXXXX	XXXXXX		milestone
2.1.4.4	Railway Crossing DZ-004, Inner Casing Pipe Length = 18 m	1	Lump Sum	XXXXXX	XXXXXX		milestone
2.1.5	Road Crossings						
	Extra Lump Sum charges to construction and installation costs under General Pipeline Construction or Protection and Special Measures. This costs group includes all additional measures, installations and works, NOT included in the required construction and installation costs under General Pipeline Construction or Protection and Special Measures costs (e.g. special crossing methods, additional earthworks, construction pits stabilization, supply and installation of casing pipes, protective pipes, spare conduits, concrete slabs, etc.)						
2.1.5.1	Closed Road Crossing DS-001, Casing Pipe Length = 22 m	1	Lump Sum	XXXXXX	XXXXXX		milestone
2.1.5.2	Closed Road Crossing DS-002, Casing Pipe Length = 22 m	1	Lump Sum	XXXXXX	XXXXXX		milestone
2.1.5.3	Closed Road Crossing DS-004, Casing Pipe Length = 18 m	1	Lump Sum	XXXXXX	XXXXXX		milestone
2.1.5.4	Closed Road Crossing DS-005, Casing Pipe Length = 26 m	1	Lump Sum	XXXXXX	XXXXXX		milestone
2.1.5.5	Closed Road Crossing DS-007, Casing Pipe Length = 40 m	1	Lump Sum	XXXXXX	XXXXXX		milestone
2.1.5.6	Closed Road Crossing DS-008, Casing Pipe Length = 16 m	1	Lump Sum	XXXXXX	XXXXXX		milestone
2.1.5.7	Closed Road Crossing DC-039, Casing Pipe Length = 38 m	1	Lump Sum	XXXXXX	XXXXXX		milestone

Item Number	Item Description	Quantity	Unit	Unit Price Supply [Euro]	Unit Price Installation [Euro]	Total Price [Euro]	Payment
2.1.5.8	<i>Closed Road Crossing DS-009, Casing Pipe Length = 24 m</i>	1	Lump Sum				milestone
2.1.5.9	<i>Closed Road Crossing DS-010, Casing Pipe Length = 18 m</i>	1	Lump Sum				milestone
2.1.5.10	<i>Closed Road Crossing DS-011, Casing Pipe Length = 18 m</i>	1	Lump Sum				milestone
2.1.5.11	<i>Closed Road Crossing DS-012, Casing Pipe Length = 18 m</i>	1	Lump Sum				milestone
2.1.5.12	<i>Closed Road Crossing DS-013, Casing Pipe Length = 46 m</i>	1	Lump Sum				milestone
2.1.5.13	<i>Closed Road Crossing DS-014, Casing Pipe Length = 16 m</i>	1	Lump Sum				milestone
2.1.5.14	<i>Closed Road Crossing DS-016, Casing Pipe Length = 18 m</i>	1	Lump Sum				milestone
2.1.5.15	<i>Closed Road Crossing DS-017, Casing Pipe Length = 23 m</i>	1	Lump Sum				milestone
2.1.5.16	<i>Closed Road Crossing DS-018, Casing Pipe Length = 23 m</i>	1	Lump Sum				milestone
2.1.5.17	<i>Closed Road Crossing DS-019, Casing Pipe Length = 16 m</i>	1	Lump Sum				milestone
2.1.5.18	<i>Closed Road Crossing DS-020, Casing Pipe Length = 18 m</i>	1	Lump Sum				milestone
2.1.5.19	<i>Closed Road Crossing DS-021, Casing Pipe Length = 18 m</i>	1	Lump Sum				milestone
2.1.5.20	<i>Closed Road Crossing DS-023, Casing Pipe Length = 18 m</i>	1	Lump Sum				milestone
2.1.5.21	<i>Closed Road Crossing DS-024, Casing Pipe Length = 16 m</i>	1	Lump Sum				milestone
2.1.5.22	<i>Closed Road Crossing DS-025, Casing Pipe Length = 20 m</i>	1	Lump Sum				milestone
2.1.5.23	<i>Closed Road Crossing DS-026, Casing Pipe Length = 18 m</i>	1	Lump Sum				milestone
2.1.5.24	<i>Closed Road Crossing DS-027, Casing Pipe Length = 20 m</i>	1	Lump Sum				milestone
2.1.5.25	<i>Closed Road Crossing DS-028, Casing Pipe Length = 20 m</i>	1	Lump Sum				milestone
2.1.5.26	<i>Open Cut Road Crossing DS-003, Casing Pipe Length = 18 m</i>	1	Lump Sum				milestone
2.1.5.27	<i>Open Cut Road Crossing DS-015, Casing Pipe Length = 16 m</i>	1	Lump Sum				milestone
2.1.5.28	<i>Minor Open Cut Road Crossings</i>	86	Lump Sum				milestone
2.1.6	Watercourse Crossings Extra Lump Sum charges to construction and installation costs under General Pipeline Construction or Protection and Special Measures. This costs group includes all additional measures, installations and works, NOT included in the required construction and installation costs under General Pipeline Construction or Protection and Special Measures costs (e.g. special crossing methods, additional earthworks, lowering of underground water table, water transfer, watercourse bridges and passages, supply and installation of buoyancy control measures and sand bags, rip-rap, stones, concrete slabs, special bank reinstatement, etc.)						
2.1.6.1	<i>Closed Watercourse Crossing DV-009, Bored Pipe Length = 32.5 m</i>	1	Lump Sum				activity progress
2.1.6.2	<i>Closed Watercourse Crossing DV-018, Bored Pipe Length = 40 m</i>	1	Lump Sum				activity progress
2.1.6.3	<i>Closed Watercourse Crossing DV-022, Bored Pipe Length = 40.6 m</i>	1	Lump Sum				activity progress

Item Number	Item Description	Quantity	Unit	Unit Price Supply [Euro]	Unit Price Installation [Euro]	Total Price [Euro]	Payment
2.1.6.4	Open Cut Watercourse Crossing (incl. piped) DV-003	1	Lump Sum	XXXXXX	XXXXXX		activity progress
2.1.6.5	Open Cut Watercourse Crossing (incl. piped) DV-011	1	Lump Sum	XXXXXX	XXXXXX		activity progress
2.1.6.6	Open Cut Watercourse Crossing (incl. piped) DV-014	1	Lump Sum	XXXXXX	XXXXXX		activity progress
2.1.6.7	Open Cut Watercourse Crossing (incl. piped) DV-019	1	Lump Sum	XXXXXX	XXXXXX		activity progress
2.1.6.8	Open Cut Watercourse Crossing (incl. piped) DV-020	1	Lump Sum	XXXXXX	XXXXXX		activity progress
2.1.6.9	Open Cut Watercourse Crossing (incl. piped) DV-032	1	Lump Sum	XXXXXX	XXXXXX		activity progress
2.1.6.10	Minor Open Cut Watercourse Crossings	23	Lump Sum	XXXXXX	XXXXXX		activity progress
2.1.7	Marker Posts Supply and installation of pipeline and FOC marker posts and markers incl. protective measures. Calculation of costs shall include transportation, excavation, supply and installation of concrete foundation, compaction of backfilling, reinstatement, etc.						
2.1.7.1	Pipeline Marker Posts	1	Lump Sum	XXXXXX	XXXXXX		overall progress
2.1.7.2	FOC Marker Posts and Markers	1	Lump Sum	XXXXXX	XXXXXX		overall progress
2.1.8	Pipeline Cathodic Protection Supply, replacement, adjustment and installation of pipeline cathodic protection posts and cables incl. connection and protection. Calculation of costs shall include transportation, earthworks, connection, crossings of third party lines, supply and installation of posts, cables and casings, compaction of backfilling, reinstatement, etc. In case of collision with existing cathodic protection cables this group includes also replacement of existing cables and re-connection wherever required.						
2.1.8.1	Cathodic Protection Posts and Cabling incl. electrodes, coupons, etc.	1	Lump Sum	XXXXXX	XXXXXX		overall progress
2.1.8.2	Pearson Survey	1	Lump Sum	XXXXXX	XXXXXX		overall progress
2.2	Line valve stations Includes but is not limited to supply of material and construction/installation of all systems and objects enumerated in the document Scope of Work within limits defined by Interface Report. Includes also supply and installation of piping material <DN300. All works and costs required to finalize works as per contract, project (tender) documentation, permits, authority statements, etc. are included.						

Item Number	Item Description	Quantity	Unit	Unit Price Supply [Euro]	Unit Price Installation [Euro]	Total Price [Euro]	Payment
2.2.1	<i>RU 06 Kateřinský potok</i>						
2.2.1.1	<i>Civil works</i>	1	Lump sum				milestone
2.2.1.2	<i>Mechanical works</i>	1	Lump sum				milestone
2.2.1.3	<i>Electrical works</i>	1	Lump sum				milestone
2.2.1.4	<i>Instrumentation and control system works</i>	1	Lump sum				milestone
2.2.1.5	<i>Telecommunication system works</i>	1	Lump sum				milestone
2.2.1.6	<i>Integrated security system works</i>	1	Lump sum				milestone
2.2.2	<i>TU33S Jirkov</i>						
2.2.2.1	<i>Civil works</i>	1	Lump sum				milestone
2.2.2.2	<i>Mechanical works</i>	1	Lump sum				milestone
2.2.2.3	<i>Electrical works</i>	1	Lump sum				milestone
2.2.2.4	<i>Instrumentation and control system works</i>	1	Lump sum				milestone
2.2.2.5	<i>Telecommunication system works</i>	1	Lump sum				milestone
2.2.2.6	<i>Integrated security system works</i>	1	Lump sum				milestone
2.2.3	<i>TU 51S Hrušovany</i>						
2.2.3.1	<i>Civil works</i>	1	Lump sum				milestone
2.2.3.2	<i>Mechanical works</i>	1	Lump sum				milestone
2.2.3.3	<i>Electrical works</i>	1	Lump sum				milestone
2.2.3.4	<i>Instrumentation and control system works</i>	1	Lump sum				milestone
2.2.3.5	<i>Telecommunication system works</i>	1	Lump sum				milestone
2.2.3.6	<i>Integrated security system works</i>	1	Lump sum				milestone
2.2.4	<i>TU 52S Sýrovice</i>						
2.2.4.1	<i>Civil works</i>	1	Lump sum				milestone
2.2.4.2	<i>Mechanical works</i>	1	Lump sum				milestone

2.2.5.5	<i>Telecommunication system works</i>	1	Lump sum				milestone
2.2.5.6	<i>Integrated security system works</i>	1	Lump sum				milestone

Item Number	Item Description	Quantity	Unit	Unit Price Supply [Euro]	Unit Price Installation [Euro]	Total Price [Euro]	Payment
2.3	<u>Cathodic protection stations</u> Includes but is not limited to supply of material and construction/installation of all systems and objects enumerated in the Scope of Work document within limits defined by Interface Report. All works and costs required to finalize works as per contract, project (tender) documentation, permits, authority statements, etc. are included.						
2.3.1	SKAO 098 Jirkov	1	Lump sum				overall progress
2.3.2	SKAO 309 Malměřice	1	Lump sum				overall progress
3	TESTING, COMMISSIONING, TRIAL OPERATION						
3.1	<u>Mechanical and EICT completion</u> Completion of all mechanical, electrical and ICT systems including tagging/labelling of all equipment. Other requirements as per documents General Technical Requirements and Scope of Work.	1	Lump sum				milestone
3.2	<u>Inspection and Testing</u> Inspection and testing of all systems including delivery of all equipment and services for complete pressure tests and pipeline stress test incl. water supply and disposal, all planning and clarification works, gauging, cleaning, drying, welding and dismantling of test chambers and end caps, connection of the test sections with golden welds, etc. Baseline geometrical pig run incl. evaluation and reports. Other requirements as per documents General Technical Requirements and Scope of Work.	1	Lump sum				milestone
3.3	<u>Pre-commissioning</u> Includes services with electrical power and utilities without availability of natural gas in the system. Other requirements as per documents General Technical Requirements and Scope of Work.	1	Lump sum				milestone
3.4	<u>Commissioning</u> First fill process of the pipeline and functional tests. Other requirements as per documents General Technical Requirements and Scope of Work.	1	Lump sum				milestone
3.5	<u>Start-up and trial operation</u> Operation of the pipeline including correction of identified shortcomings or defects, executing routine maintenance and cleaning works. Other requirements as per documents General Technical Requirements and Scope of Work.	1	Lump sum				milestone

Item Number	Item Description	Quantity	Unit	Unit Price Supply [Euro]	Unit Price Installation [Euro]	Total Price [Euro]	Payment
4	FINISHING WORKS						
4.1	Site cleaning Including waste management, disposal and treatment of surplus material incl. associated costs, measures, etc. Other requirements as per documents General Technical Requirements and Scope of Work.	1	Lump sum	 	 		milestone
4.2	Demobilization Complete demobilization of all facilities, materials, equipment, machinery, personnel, fences, land, temporary site facilities alongside pipeline route incl. water, electricity, mobile toilets, parking places and other supplies for construction purposes.	1	Lump sum	 	 		milestone
4.3	Training of Employer personnel Training of Employer's key personnel in all the systems, which are essential for the safe and reliable operation of the pipeline system and all subsystems. Other requirements as per documents General Technical Requirements and Scope of Work.	1	Lump sum	 	 		milestone
4.4	Health and safety signs As per relevant station layouts.	1	Lump sum	 	 		milestone
4.5	Cleaning of fire water basin in Syrovice As per HZS (fire brigade) requirements.	1	Lump sum	 	 		milestone

Item Number	Item Description	Quantity	Unit	Unit Price Supply [Euro]	Unit Price Installation [Euro]	Total Price [Euro]	Payment
5	OPTIONAL ITEMS						
5.1	Pipe yards construction Complete construction as per project documentation. Other requirements as per documents General Technical Requirements and Scope of Work. Note: Operation of pipe yards shall be included in item 1.4 above.						
5.1.1	<i>Pipe yard - Hora Svaté Kateřiny</i>	1	Lump sum				milestone
5.1.2	<i>Pipe yard – Vrskmaň</i>	1	Lump sum				milestone
5.1.3	<i>Pipe yard – Nezabylice</i>	1	Lump sum				milestone
5.1.4	<i>Pipe yard – Chudeřín</i>	1	Lump sum				milestone

..1		DEMOLITION WORKS																		
		General Remarks																		
		This chapter covers all required demolition works related to the EPC contract.																		
		All demolished materials have to be removed from the construction site and professional disposed at a officially approved dumpsite.																		
		All required works for the complete demolition have to be taken into consideration in the relevant unit rates and will not be paid separately.																		
..1.1	R	Demolition of Wire Mesh Fences Complete demolition of existing wire mesh fence including foundations.	323	m1					100	65	0	45	23	90						
..1.2	R	Temporary Dismantling and Reinstallation of Wire Mesh Fences Temporary dismantling of existing wire mesh fence including foundations, including transport and storage of dismantled material and its complete reinstallation in the original position and quality. Including gates, emergency doors, if they are located in the dismantled part of the fence.	65	m1					65	0	0	0	0	0						
..1.3	R	Temporary Dismantling and Reinstallation of Concrete Cable Trench and Shafts Temporary dismantling of existing concrete cable trench and shafts, including transport and storage of dismantled material and its complete reinstallation in the original position and quality. Various size and types as per coordination layouts, typical drawings. Including covers, etc.	70	m1					70	0	0	0	0	0						
..1.4	R	Demolition/Relocation Others - DN Kateřinský potok Other demolitions or relocations, which are not listed in previous demolition items. Such as complete demolition/relocation of existing lighting poles including foundation, demolition/relocation of existing cable channels, etc.	1	Lump Sum					1											
..1.5	R	Demolition/Relocation Others - LVS Jirkov Same as above for specific station.	1	Lump Sum						1										
..1.6	R	Demolition/Relocation Others - LVS Vrskmaň Same as above for specific station.	1	Lump Sum							1

..1.9	R	Demolition/Relocation Others - LVS Malměřice Same as above for specific station.	1	Lump Sum																1
..2		SITE GRADING AND EARTHWORKS																		
..2.0		General Remarks																		
		This chapter covers all required earth works for site grading, excavation and backfilling for all structures as well as the finishing works for green areas.																		
		The contractor having fully responsibility to store the required quantities of excavated soil for the backfilling works on site or at a intermediate dumpsite.																		
		Unsuitable and surplus soil material have to be removed from the construction site and professional disposed at a officially approved dumpsite.																		
		The calculation of the excavation quantities for the site grading is based on the bottom level of the top soil stripping.																		

Civil works - Line valve stations					Total Price [Euro]		0,00		0,00		0 €		0 €		0 €		0 €		0 €	
Item Number	Item Type	Item Description	Total Quantity	Unit	Unit Price Supply [Euro]	Unit Price Installation [Euro]	Total Unit Price [Euro]	Total Price [Euro]	quant	price										
		Excavations, backfillings accounting according to m3 compacted soil volume. Including terrain shaping for unpaved storm water drainage channels.																		
..2.1	R	Soil Mass Excavation Soil mass excavation of soil grade 1-4 for site grading purposes, including terrain shaping for unpaved storm water drainage channels, including excavations for structures and foundations. Including loading, transport and storage of excavation material. Including potential dewatering works of the excavation pits.	8385	m3					1260		857		1744		1068		873		2584	
..2.2	R	Hand Excavation Excavation of soil grade 1-4 per hand in areas where mechanical excavation is impossible or prohibited. Independent of the depth of the excavation pit. Including loading, transport and storage of excavation material. Including potential dewatering works of the excavation pits.	168	m3					25		17		35		21		17		52	
..2.3	R	Soil Mass Backfilling with Excavation Material Including Compaction Soil mass backfilling with stored excavation material for site grading purposes, including terrain shaping for unpaved storm water drainage channels, including the excavations for structures and foundations. Assembling and compaction in layers, maximum thickness of the layers and compaction characteristics according to specification. Including loading and transport from the intermediate dump site.	7993	m3					900		857		1744		1035		873		2584	
..2.4	R	Soil Mass Backfilling with Supplied Material Including Compaction Soil mass backfilling with supplied suitable soil material for site grading purposes, including terrain shaping for unpaved storm water drainage channels, including the excavations for structures and foundations. Supply of suitable material is expected to be provided from suitable surplus soil material from HPPL pipeline installation. Assembling and compaction in layers, maximum thickness of the layers according to specification. Including loading and transport from the intermediate dump site.	2158	m3					0		1659		22		0		269		208	
..2.5	R	Compaction of Backfilling of the Pipeline Trench Inside Stations Compaction of backfilling material of the pipe trench in layers according to the Earthworks Specification. Compaction requirements applicable for station, requirements for fill below structures foundations, etc. shall be met.	6	Lump Sum					1		1		1		1		1		1	
..2.6	R	Spreading of Top Soil and Seeding of Green Areas Spreading of stored top soil material, manual distribution with a rake, minimum thickness according to the original thickness of stripped top soil as per pedological survey. Including loading and transport from the intermediate dump site. Including seeding of green areas including fertilisation and watering of the green areas until the first grass-cutting.	4880	m2					700		650		260		250		620		2400	
..2.7	R	Removal of Unsuitable and Surplus Soil Material Unsuitable and surplus soil material have to be removed from the construction site and professionally disposed at an officially approved dumpsite. Including of transport to the dumpsite in as well as costs for dumping. Accounting according to m3 difference in the balance of excavation and backfilling volume of the above listed items.	452	m3					385		0		13		54		0		0	
..2.8	R	Concrete Cable Trench Excavation, construction and backfilling of reinforced concrete cable trench with removable cover according to the typical drawing and specification. Including type for traffic areas. Including cable shafts.	670	m1					0		205		55		110		75		225	

Civil works - Line valve stations					Total Price [Euro]		0,00		0,00		0 €		0 €		0 €		0 €		0 €	
Item Number	Item Type	Item Description	Total Quantity	Unit	Unit Price Supply [Euro]	Unit Price Installation [Euro]	Total Unit Price [Euro]	Total Price [Euro]	quant	price										
..2.9	R	Underground Cable Conduits Excavation, construction and backfilling of cable conduits buried in earth. Including cable shafts. Supply of cable conduits is not included in this item. Including supply and assembling of sand for sand bedding of cable conduits and cable warning tapes.	227	m1					0		32		50		30		35		80	
..2.10	R	Cable Road Crossing Excavation, construction and backfilling of cable road crossing with PVC cable conduits embedded with lean concrete grade C12/15 X0 at road crossings.	169	m1					0		26		53		20		0		70	
..2.11	R	Sheet Piling Installation of sheet piling for needs of excavation works. Including detail design of the sheet piling, material supply, material temporary storage, anchors, horizontal steel beams, topping ring beam, bracings, etc. Including material removal and disposal. Height of piles as per excavation pit needs. Counted as per m1 of the sheet piling wall.	55	m1					55		0		0		0		0		0	
..2.12	R	Installation of Casing Pipes Installation of casing pipes for 2 existing underground gas pipelines DN 900 below new access road to the new station. Including detail design of the casing pipe, installation, material supply, material temporary storage, etc. Including material removal and disposal. Length of casing pipes as per coordination drawings.	2	pcs					0		0		2		0		0		0	
..3		CONCRETE WORKS																		
..3.0		General Remarks Difficulties for concreting works at low temperatures have to be taken into consideration in the relevant unit rates and will not be paid separately. Difficulties for chamfering of edges, providing of pockets and openings, embedding of cable conduits, embedding of steel parts or anchoring elements have to be taken into consideration in the relevant unit rates and will not be paid separately.																		
..3.1	R	Structural Concrete Supply of the material and construction of structural concrete for all concrete structures exposed to atmospheric conditions or in contact with soil. Concrete Grade C35/45, XC3, XF3, XA1 or grade C35/45, XC3, XF3, XA3, XD2. Including: - Formwork - Reinforcement bars, reinforcement meshes, Grade BSt 500 S - Lean concrete layer, 10cm, Grade C12/15, X0 - Non shrinkable grouting - Foundation earthing, 30/3.5mm - Earthing connections - Cable conduits - Embedded anchoring elements - Other embedded steel elements Including levelling and compaction of excavation surface.	725	m3					0		130		130		130		135		200	
..4		STEEL STRUCTURES																		
..4.0		General Remarks The preparation of the detailed static calculations as well as of the workshop drawings is part of contractors scope of work.																		

Civil works - Line valve stations					Total Price [Euro]		0,00		0,00		0 €		0 €		0 €		0 €		0 €

									quant	price	quant	price	quant	price	quant	price	quant	price	quant	price
		Steel grade S235JR. All structural steel elements have to be hot dip galvanized according to the specification.																		
		Including all required fixing materials, screws, bolts, etc. for the structural steel construction.																		
		Including all required anchorings to foundations with an anchoring system.																		
		Including all required scaffolds for the installation.																		
..4.1	R	Steel Structures	15000	kg					0	1500	1500	1500	1500							9000
		Supply of the materials, fabrication and installation of the steel structures for platforms, crossovers, supporting steel plates according to the construction drawings and static calculations.																		
		Including: - grating for stairs, platforms, crossovers, etc. Design load 5kN/m2. - hand rails, chain hand rails - kicker plates, etc.																		
..5		ROADS AND PAVED AREAS STATION																		
..5.1	R	Asphalt Paved Area	1070	m2					0	225	235	232	53							325
		Supply of the material and construction of the asphalt concrete wearing course paved area according to typical drawing and specification.																		
		Consisting mainly of: - Asphalt concrete wearing course, grade AC011, thickness 60mm - Bituminous base course layer, R-Material, thickness 60mm - SD crushed run material layer, thickness 250mm - Crushed run material layer, various thickness, min. 250mm - Geotextile 200g/m2																		
		Including: - Excavation works, compaction of sub grade - Prefabricated concrete curb stones 30/15cm, straight and curved, laid in concrete bedding of min. thickness 10cm - Road shoulders.																		
..5.2	R	Concrete Interlocking Tile Paved Area	1390	m2					0	0	230	0	0							1 160
		Supply of the material and construction of the concrete interlocking tiles paved area according to typical drawing and specification.																		
		Consisting mainly of: - Concrete interlocking tiles, thickness 100mm. Joints have to be filled with sand and the finished surface have to be compacted with a compactor. - Base course 30mm - SD crushed run material layer, thickness 200mm - Crushed run material layer, various thickness, min. 200mm - Sand-gravel 100mm - Geotextile 200g/m2																		
		Including: - Excavation works, compaction of sub grade - Prefabricated concrete curb stones 30/15cm, straight and curved, laid in concrete bedding of min. thickness 10cm - Road shoulders.																		
..5.3	R	Gravel Area, 100mm	4720	m2					0	1250	260	420	290							2500
		Supply of the material and construction of the gravel areas. Grain size 8/16mm. Thickness 100mm.

		Including: - Geotextile 200g/m2 - Compaction of sub grade - Prefabricated concrete curb stones 5/20cm (only where gravel area is not adjacent to fence sill or road curb stone), laid in concrete bedding of min. thickness 10cm																		
..6		FENCE AND GATES																		
..6.0		General Remarks All steel fencing material to be hot dip galvanized and PE coated.																		
..6.1	R	Fence Supply of the materials and construction of a wire mesh pannels fence including posts, foundations according to typical drawing and specification. Total fence height 2.50m above finished ground level. Fence consisting of: - posts - corner posts - intermediate straining posts - wire mesh pannels - razor wire on V-shape extension arms with 2+2 rows of straining wires	556	m1					0	110	105	91	53	197						
		Including: - Foundations - Levelling concrete, thickness minimum 10cm - Concrete sill between post foundations - Excavation and backfilling works, compaction of excavation surface - Including emergency doors																		
..6.2	R	Entrance Gate, Double Wing, width 6.00m Supply of the material, construction and installation of a double wing entrance gate according to typical drawing and specification. Width 6.00m, gate height 2.50m. The complete gate structure shall be in galvanised steel. Double wing gate consisting of: - Gate frame, height 2.00m with vertical extension arms 0.50m for razor wire on 2 strands of straining wire - 1 bracing for each door wing - Covered with wire mesh pannels - Equipped with locking system	1	Pieces					0	0	0	0	0	1						
		Including: - Two gate posts and straining post - Foundations - Levelling concrete, thickness minimum 10cm - Concrete sill between the two post foundations - Excavation and backfilling works																		
..6.3	R	Entrance Gate, Sliding, width 4.00m Supply of the material, construction and installation of a sliding entrance gate according to typical drawing and specification. Width 4.00m, gate height 2.50m. The complete gate structure shall be in galvanised steel. Sliding gate consisting of: - Gate frame, height 2.00m with vertical extension arms 0.50m for razor wire on 2 strands of straining wire - Bracing - Covered with wire mesh pannels - Equipped with locking system	1	Pieces					0	0	1	0	0	0

Pipeline works - Unit rates			Total Price - Pipeline Unit Rates [Euro]					0,00
Item Number	Item Type	Item Description	Total Quantity	Unit	Unit Price Supply [Euro]	Unit Price Installation [Euro]	Total Unit Price [Euro]	Total Price [Euro]
		Notes:						
		The stated quantities are just of tender evaluation purposes.						
		Unit prices will be used in case of variation orders.						
..1		Pipeline Standard rates comprise of total costs, including materials, installation and man hours, on request of Employer and not included in the Contract. Unit m1 stands for linear pipeline (road) meter as per horizontal chainage incl. full width of RoW. Real 3D length and construction reserve (e.g. cut & waste) must be considered by the CONTRACTOR.

..2		Construction Works						
..2.1		Extra Crossings						
..2.1.1		Closed Road Crossing DN1600/2040 including casing pipe supply and complete installation	1	m1				

Pipeline works - Unit rates			Total Price - Pipeline Unit Rates [Euro]					0,00
Item Number	Item Type	Item Description	Total Quantity	Unit	Unit Price Supply [Euro]	Unit Price Installation [Euro]	Total Unit Price [Euro]	Total Price [Euro]
..2.1.2		Closed Road Crossing DN1800/2240 including casing pipe supply and complete installation	1	m1				
..2.1.3		Closed Railway Crossing DN1600/1900 including casing pipe supply and complete installation	1	m1				
..2.1.4		Closed Railway Crossing DN1800/2100 including casing pipe supply and complete installation	1	m1				
..2.1.5		Open Cut Minor Road Crossing - casing DN1600/2040 incl. equipment and assemblies installation, pipe pulling-in and road reinstatement.	1	m1				
..2.1.6		Open Cut Minor Road Crossing - casing DN1800/2240 incl. equipment and assemblies installation, pipe pulling-in and road reinstatement.	1	m1				
..2.1.7		Open Cut Minor Road Crossing - no casing pipe, without reinstatement	1	m1				
..2.1.8		Direct product pipe boring DN1400	1	m1				
..2.1.9		LPE DN160 Boring including casing pipe	1	m1				
..2.2		Trenching for Cathodic Protection and other Cables Temporarily storage of topsoil, re-instatement of topsoil after cable/conduit laying, sowing. Machine excavation of the trench up to 1m depth, temporary storage of excavated soil, backfilling and compaction.	1	m1				
..2.3		Trenching for 56" Pipe						
..2.3.1		Trenching in Soil Class 1	1	100 m3				
..2.3.2		Trenching in Soil Class 2	1	100 m3				
..2.3.3		Trenching in Soil Class 3	1	100 m3				
..2.3.4		Trenching in Soil Class 4	1	100 m3				

Pipeline works - Unit rates			Total Price - Pipeline Unit Rates [Euro]					0,00
Item Number	Item Type	Item Description	Total Quantity	Unit	Unit Price Supply [Euro]	Unit Price Installation [Euro]	Total Unit Price [Euro]	Total Price [Euro]
..2.3.5		Trenching in Soil Class 5	1	100 m3				
..2.3.6		Trenching in Soil Class 6	1	50 m3				
..2.3.7		Trenching in Soil Class 7	1	10 m3				
..2.4		Preparation of Working Strip	1	100 m1				
..2.5		Stringing and Bending of Pipes	1	100 m1				
..2.6		Supply and Installation of Pipeline Sand Bedding and Padding incl. compaction	1	100 m1				
..2.7		Manual Excavation	1	10 m3				
..2.8		Additional Bags of Sand-Cement Mixture as per typical drawing	1	10 pieces				
..2.9		Additional Bags of Sand as per typical drawing	1	10 pieces				
..2.10		Additional Geotextile min. 500 g/m ² As pipeline protection warpped around the pipeline	1	100 m2				
..2.11		Additional Geotextile min. 1000 g/m ² As pipeline protection warpped around the pipeline	1	100 m2				
..2.12		Compaction of Sand, Gravel or Suitable Soil Backfilling in compaction layers to 95 % Proctor	1	100 m3				
..2.13		Geogrid for sloped surface permanent stabilization	1	100 m2				
..2.14		Wooden facines for sloped surface permanent stabilization	1	10 pieces				
..2.15		Temporary and Permanent Support, Stabilization and Protection of Any Crossed Line <DN300	1	piece				

Pipeline works - Unit rates			Total Price - Pipeline Unit Rates [Euro]					0,00
Item Number	Item Type	Item Description	Total Quantity	Unit	Unit Price Supply [Euro]	Unit Price Installation [Euro]	Total Unit Price [Euro]	Total Price [Euro]
..2.16		Temporary and Permanent Support, Stabilization and Protection of Any Crossed Line >DN300	1	piece				
..2.17		Assembly and Installation of DN1600/2040 Casing Pipe - Open Cut	1	m1				
..2.18		Assembly and installation of DN18002240 Casing pipe - Open Cut	1	m1				
..2.19		Casing pipe DN1600/2040 Equipment and Installation (spacers, end seals, steel bands, etc.)	1	kpl				
..2.20		Casing pipe DN18002240 Equipment and Installation (spacers, end seals, steel bands, etc.)	1	kpl				
..2.21		Asphalt Roads Crossing - Road Reinstatement	1	m1				
..2.22		Gravel Roads Crossing - Road Reinstatement	1	m1				
..2.23		Dirt Roads Crossing - Road Reinstatement	1	m1				
..2.24		Road Slip - Supply a Installation of Water Transfer Pipe DN300	1	piece				
..2.25		Road Slip - Supply a Installation of Water Transfer Pipe DN500	1	piece				
..2.26		Supply and Installation of Sheet Piling (depth of 8 m)	1	50 m2				
..2.27		Removal and Disposal of Sheet Piling (depth of 8 m)	1	50 m2				
..2.28		Watercourse Crossing - Supply a Installation of Arranged Stone Protection 200 kg	1	10 m3				
..2.29		Watercourse Crossing - Supply a Installation of Arranged Stone Protection 500 kg	1	10 m3				
..2.30		Watercourse Crossing - Supply a Installation of Stone Backfill	1	10 m3				
..2.31		Watercourse Crossing - Supply a Installation of Clay Plug (incl. compaction)	1	5 m3				

Pipeline works - Unit rates			Total Price - Pipeline Unit Rates [Euro]					0,00
Item Number	Item Type	Item Description	Total Quantity	Unit	Unit Price Supply [Euro]	Unit Price Installation [Euro]	Total Unit Price [Euro]	Total Price [Euro]
..2.32		Watercourse Crossing - Supply a Installation of Backfill Plug (incl. compaction)	1	5 m3				
..2.33		Watercourse Crossing - Supply a Installation of Water Transfer Pipe DN500	1	piece				
..2.34		Watercourse Crossing - Supply a Installation of Water Transfer Pipe DN1000	1	piece				
..2.35		Ditch Breaker	1	piece				
..2.36		Casing Pipe Fill with Bentonite Mixture	1	10 m3				
..2.37		Watercourse Crossings - Water Transfer / By-pass and Temporary Crossings for Machinery	1	kpl				
..2.38		Pipeline Trench Dewatering	1	100 m1				
..2.39		Underground Water Table Lowering	1	100 m1				
..3		Supply and Disposal of Materials						
..3.1		Disposal of Degraded Topsoil	1	100 m3				
..3.2		Supply of Native and Approved Topsoil	1	100 m3				
..3.3		Disposal of Subsoil	1	100 m3				
..3.4		Supply of Native and Approved Subsoil	1	100 m3				
..3.5		Supply of Approved Sand	1	100 m3				
..3.6		Supply of Approved Gravel	1	50 m3				
..3.7		Supply of Wooden Construction Logs	1	Ton				
..3.8		Disposal of Hydrotest Water Including Transport	1	1000 m3

Item Number	Item Type	Item Description	Total Quantity	Unit	Unit Price Supply [Euro]	Unit Price Installation [Euro]	Total Unit Price [Euro]	Total Price [Euro]
..3.9		Disposal of Concrete or Rock	1	10 Ton				
..3.10		Disposal of Trees or Other Organic Obstacles	1	10 Ton				
..3.11		Supply and Application of Seeding - Grass	1	1000 m2				
..3.12		Protective Concrete Ring DN1000 Including Gravel Fill	1	piece				
..3.13		Protective concrete ring DN600 Including Gravel Fill	1	piece				
..3.14		HDPE Conduit DN40	1	100 m1				
..3.15		LPE Casing DN160	1	10 m1				
..3.16		HDPE Joint	1	10 pieces				
..3.17		HDPE End Cap	1	10 pieces				
..3.18		Pipeline Warning Tape	1	100 m1				
..3.19		FOC Warning Tape	1	100 m1				
..3.20		Casing Kopoflex/Kopohalf 110mm	1	100 m1				
..3.21		Casing Kopoflex/Kopohalf 125mm	1	100 m1				
..3.22		Casing Kopoflex/Kopohalf 160mm	1	100 m1				
..3.23		FOC Concrete Gutter (Casing)	1	100 m1				
..3.24		Casing Pipe DN1600/2040 for Open Cut Road Crossings	1	m1				

Pipeline works - Unit rates			Total Price - Pipeline Unit Rates [Euro]					0,00

..3.25		Casing Pipe DN1800/2240 for Open Cut Road Crossings	1	m1				
..3.26		Cable Marker - Above Ground	1	piece				
..3.27		Cable Marker - Under Ground	1	piece				
..3.28		Pipeline Marker	1	piece				
..3.29		Foundation Concrete "Slabs" (not reinforced) Class C12/15 in Open Trench (protective slab)	1	10 m3				
..3.30		Road Concrete Slab 150 mm	1	10 pieces				
..3.31		Road Concrete Slab 180 mm	1	10 pieces				
..3.32		Pipeline Concrete Weight	1	10 piece				
..3.33		Stabilization of Pipeline Working Strip for Construction on Unbearable Soil	1	10 m1				
..3.34		Drainage pipe DN65	1	50 m1				
..3.35		Drainage pipe DN100	1	50 m1				
..3.36		PVC pipe DN100	1	10 m1				
..3.37		PVC pipe DN200	1	10 m1				
..3.38		Drainage shaft DN800	1	piece				
..4		Costs for Work Standstill As approved in advance in writing						
..4.1		Costs for Work Standstill Due to Archaeological Finding	1	per day				

Pipeline works - Unit rates			Total Price - Pipeline Unit Rates [Euro]					0,00
Item Number	Item Type	Item Description	Total Quantity	Unit	Unit Price Supply [Euro]	Unit Price Installation [Euro]	Total Unit Price [Euro]	Total Price [Euro]
..4.2		Costs for Work Standstill Due to Flood	1	per day				
..4.3		Costs for Work Standstill Due to UXO Finding	1	per day				
..5		Special Obstacles						
..5.1		Backfill of Terrain Slump at Undermined Area With Gravel	1	Piece				
..5.2		Backfill to Stop Landslide Movements	1	Piece

Notes:								
The stated quantities are just of tender evaluation purposes.								
Unit prices will be used in case of variation orders.								
..1 Pipes								
..1.1		Pipe - Longitudinally Welded, DN 1200	1	Pc.				
..1.2		Pipe - Longitudinally Welded, DN 700	1	Pc.				
..1.3		Pipe - Longitudinally Welded, DN 500	1	Pc.				
..1.4		Pipe - Longitudinally Welded, DN 300	1	Pc.				
..1.5		Pipe - Seamless, DN 100	1	Pc.				
..1.6		Pipe - Seamless, DN 80	1	Pc.				
..1.7		Pipe - Seamless, DN 50	1	Pc.				
..2 Flanges								
..2.1		Flange, Welding Neck, RF, DN 500, Class 600	1	Pc.				
..2.2		Flange, Welding Neck, RF, DN 300, Class 600	1	Pc.				
..2.3		Flange, Welding Neck, RF, DN 100, Class 600	1	Pc.				
..2.4		Flange, Welding Neck, RF, DN 80, Class 600	1	Pc.				
..2.5		Flange, Welding Neck, RF, DN 50, Class 600	1	Pc.				
..2.6		Blinds, DN 300	1	Pc.				
..2.7		Blinds, DN 100	1	Pc.				
..2.8		Blinds, DN 80	1	Pc.				
..2.9		Blinds, DN 50	1	Pc.				
..3 Elbows								
..3.1		Elbow 90° (R=1.5DN-LR), DN 1200	1	Pc.				
..3.2		Elbow 45° (R=1.5DN-LR), DN 1200	1	Pc.				
..3.3		Elbow 90° (R=1.5DN-LR), DN 700	1	Pc.				
..3.4		Elbow 90° (R=1.5DN-LR), DN 500	1	Pc.				
..3.5		Elbow 90° (R=1.5DN-LR), DN 300	1	Pc.				
..3.6		Elbow 90° (R=1.5DN-LR), DN 100	1	Pc.				
..3.7		Elbow 90° (R=1.5DN-LR), DN 80	1	Pc.

..4		Tees						
..4.1		Tee, Reduced, DN 1200 / DN 700	1	Pc.				
..4.2		Tee, Straight, DN 500	1	Pc.				
..4.3		Tee, Straight, DN 300	1	Pc.				
..4.4		Tee, Reduced, DN 300 / DN 150	1	Pc.				
..4.5		Tee, Straight, DN 100	1	Pc.				
..4.6		Tee, Straight, DN 80	1	Pc.				
..5		Reducers						
..5.1		Reducer, Concentric/Eccentric, DN 700 / DN 500	1	Pc.				
..5.2		Reducer, Concentric/Eccentric, DN 500 / DN 300	1	Pc.				
..5.3		Reducer, Concentric/Eccentric, DN 150 / DN 100	1	Pc.				
..6		Ball Valves						
..6.1		Ball Valve, Gas Hydraulic, DN 1200, Class 600	1	Pc.				
..6.2		Ball Valve, Motor Operated, DN 500, Class 600	1	Pc.				
..6.3		Ball Valve, Motor Operated, DN 300, Class 600	1	Pc.				
..6.4		Ball Valve, Manually Operated, DN 300, Class 600	1	Pc.				
..6.5		Ball Valve, Manually Operated, DN 100, Class 600	1	Pc.				
..6.6		Ball Valve, Manually Operated, DN 80, Class 600	1	Pc.				
..6.7		Ball Valve, Manually Operated, DN 25, Class 600	1	Pc.				
..6.8		Ball Valve, Manually Operated, DN 15, Class 600	1	Pc.				
..7		Gate Valves						
..7.1		Gate Valve, Motor Operated, DN 300, Class 600	1	Pc.				
..7.2		Gate Valve, Manually Operated, DN 300, Class 600	1	Pc.				
..7.3		Gate Valve, Manually Operated, DN 100, Class 600	1	Pc.				
..7.4		Gate Valve, Manually Operated, DN 80, Class 600	1	Pc.				
..8		Throttling Valves						
..8.1		Axial throttling Valve, Motor Operated, DN 500, Class 600	1	Pc.
